

The Vocation and Career Map

The Vocation and Career Map shows geographic areas where you are more likely to attract good employment and business opportunities into your life.

Areas on the map that are tinted with a red color are the best areas for attracting good business situations. Yellow areas are also good, but not as powerful as the red areas. The orange-colored areas fall in between the red and yellow areas in intensity. A geographic area varies from light yellow (slight vocation and career emphasis) to deep red (strongest vocation and career emphasis).

An area with no coloration is not a strong area for employment and career pursuits. This does not mean that you are destined to unemployment or miserable work conditions if you live in one of these areas. It simply means that there is no astrological boost to help you attract a better career situation in this area, but this fact does not mean that there is a roadblock that prevents you from finding very good career opportunities in these geographic areas.

You should use common sense when studying your Vocation and Career Map. For example, suppose that you have just finished school and are entering the job market, or you are changing careers. If you live in a town that has a high demand for the kind of work that you want to do, and there are not enough qualified people to perform this service, then it is very likely that you will find suitable employment even if the Career and Vocation Map has no yellow or red coloration in this geographic area. Also, if you have a positive attitude, the necessary skills, and are motivated and capable, then these traits will assist you tremendously in finding a worthwhile vocation regardless of whether the area is astrologically the most suitable for you.

However, some people are surprised to find a perfect vocational situation in a particular area, or, at the other extreme, to have difficulty in a geographic area where there are lots of opportunities. The Career and Vocation Map can help you identify those areas that are either favorable or unfavorable for unknown reasons. Astrology often explains what otherwise is difficult to understand.

Note also that astrology is not fatalistic. It is up to you to utilize the energies available to you in the best possible way. Astrology can help you better understand what kinds of energies underlie your present situation, and thereby help you to take the right steps to improve your life.

The Career and Vocation Map shows areas where you are most likely to attract good employment and business opportunities. There are also qualitative differences to various geographic areas. In some areas, for example, you are more energetic and focused on the tasks at hand and therefore you are more effective and consequently more successful in your work, while in other areas you attract benefits from people who are wealthy or powerful. Both areas are good for improving your work environment but the quality of the influence is different. Given below is a brief explanation of the influences that are in your Career and Vocation Map. If you follow the lines through the map, you will see astrological symbols in a light yellow or pink oval-shaped area. Locate the symbol on the pages below to see what the "flavor" of this influence is. In the description of these astrological influences we frequently emphasize what you can do to utilize the astrological influence to best advantage. As we said earlier, astrology is not fatalistic and

should never be an excuse for failure or problems in your life. You have the ability and opportunity each day to express the energies available to you in new, creative, positive life-enhancing ways.

Some symbols have a number between the 2 glyphs of the planets. If the number is 20, 80, 100, 140, or 160 it will not appear in the list of symbols below, but it has the same meaning as the number 40. Here is a list of numbers that do not appear in the list of symbols below, and the number in the symbol with the same meaning:

40 is the same as 20, 80, 100, 140, and 160

72 is the same as 36, 108, and 144.

51-26 is the same as 25-43, 77-09, 102-51, and 154-17.

Areas of intensity on your Vocation and Career Map are very sensitive to accuracy of birth time. On average, a difference of 1 minute in the time of birth can move the astrological influence about 15 miles in an east-west direction. Because it is very possible that your birth time can be inaccurate by a few minutes, you may find that the Vocation and Career Map can pinpoint the towns and cities that are most suitable for you, but you must rely on your own intuition to guide you to the most suitable areas within that town.

Your Vocation and Career Map is based on the most sophisticated and accurate astrological techniques available. These astrological influences have not yet been scientifically verified and astrology is a very controversial subject, but we do believe that there is validity to this map, and we hope you find it useful.
